

Kit B. Malia received his master's degree from the University of Surrey, UK, in 1994. He is a qualified teacher of children and adults with learning disabilities, and is certified in the practice of cognitive rehabilitation therapy. Since 1987 he has worked as a cognitive rehabilitation therapist in the Brain Injury Rehabilitation Group at Royal Air Force Headley Court, Surrey, UK. This center provides rehabilitation for all British service personnel. He is a board member of the Society for Cognitive Rehabilitation, and Chair of the European Committee for the Society for Cognitive Rehabilitation.

Kristin C. Bewick received her master's degree from Marywood College, Pennsylvania, in 1993. Ms. Bewick began a doctoral program in human development at Marywood University in 1996. She is certified in special education, elementary education, reading specialization, and in the practice of cognitive rehabilitation therapy. Since 1987, she has worked as a cognitive therapist in the Brain Injury Program at Allied Services, John Heinz Institute of Rehabilitation Medicine, Wilkes-Barre, Pennsylvania. She is a board member of the Society for Cognitive Rehabilitation.

Michael J. Raymond received his doctoral degree from Florida State University in 1981. For the past 16 years, his clinical and research focus has been in neurorehabilitation. Since 1986 he has been the director of Neuropsychological/Cognitive Services and clinical director of the Brain Injury Program at Allied Services, John Heinz Institute of Rehabilitation Medicine, Wilkes-Barre, Pennsylvania. He also maintains a private practice with Monmouth Neuropsychology Associates, Red Bank, New Jersey. He is a diplomate of the American Board of Professional Neuropsychology and a fellow of the National Academy of Neuropsychology and the American College of Professional Neuropsychology.

Thomas L. Bennett received his doctoral degree from the University of New Mexico in 1968. His research has focused on clarifying brain-behavior relations using both animal and human research approaches. His current research interests include clarifying the effects of neurological injuries and diseases on cognitive functions and the efficacy of neurorehabilitation interventions. He has been involved in the field of cognitive rehabilitation since 1981. He is currently a professor of psychology at Colorado State University and is the clinical director of the multidisciplinary Brain Injury Recovery Program in Fort Collins, Colorado. He is a diplomate in clinical neuropsychology, American Board of Professional Neuropsychology, and a fellow of the National Academy of Neuropsychology and the American College of Professional Neuropsychology.
