## About the Authors

**Keith E. Williams, PhD**, is an associate professor of pediatrics at the Penn State College of Medicine. He has been the director of the Feeding Program at the Penn State Hershey Medical Center for 10 years and has 17 years of experience working with children with feeding problems. Dr. Williams and his staff have worked with children from 21 states and from five countries outside of the United States. He is a licensed psychologist and a board certified behavior analyst.

Dr. Williams has written a dozen articles on childhood feeding problems. He has presented over 100 workshops and talks on childhood feeding problems both nationally and internationally.

In addition to conducting clinical research on childhood feeding problems, Dr. Williams is currently conducting research on obesity prevention and the relationship between taste acuity and feeding problems.

**Richard M. Foxx, PhD**, is a professor of psychology at Penn State Harrisburg. He is a clinical adjunct professor of pediatrics at the College of Medicine of the Pennsylvania State University. Dr. Foxx has written eight books, five of which have been translated into other languages. He has co-edited two books, *Making a Difference: Behavioral Intervention for Autism* and *Controversial Therapies for Developmental Disabilities*. He has written over 130 scientific publications, has made 13 training films, and has given over 1,500 talks on the use of behavioral principles to treat individuals with autism, mental retardation, mental illness, emotional disturbances, and typical development. Dr. Foxx is an internationally recognized expert in treating behavioral problems. He has lectured in 17 foreign countries and in 47 states throughout the United States. He is the editor-in-chief of the journal *Behavioral Interventions* and is on the editorial board of seven scientific journals. Dr. Foxx is a Fellow in five divisions of the American Psychological Association, the American Psychological Society, The Association for Behavior Analysis–International, and the American Association on Mental Retardation. He was the president of the Society for the Advancement of Behavior Analysis, the Association for Behavior Analysis, and the Division of Mental Retardation and Developmental Disabilities of the American Psychological Association. In 1998, he received a Lifetime Achievement Award from the New York State Association for Behavior Analysis and was made an honorary member of the Norwegian Association for Behavior Analysis. In 2001, he received an award from the New York State Association for Behavior Analysis for significant contributions to behavior analysis. In 2003, he received the Society for the Advancement of Behavior Analysis Award for Effective Presentation of Behavior Analysis in the Mass Media. He helped found the Pennsylvania Association for Behavior Analysis, was its first president, and serves as its executive director. He also was president of the Pennsylvania chapter of the American Association on Mental Retardation. He has served as an expert witness in a number of court cases involving individuals with autism and developmental disabilities, including *Youngberg v. Romeo*, which was heard by the U.S. Supreme Court. He is a licensed psychologist and board certified behavior analyst. One of his books has sold over 2 million copies and has been translated into seven

---

languages, and one of his training films, *Harry* (the treatment of a self-abusive man), has won numerous cinematic awards.

Dr. Foxx's current interests include developing an index for determining the severity of individual cases; an index for determining the severity of individuals treated in professional and scientific journals; and effective, comprehensive treatment programs for individuals displaying severe forms of behavior, such as aggression and self-injury. He consults on programs and serves as an expert witness for agencies and families throughout the world.
