Chapter 1	Sensory Integration Theory Revisited	1
	Neurobiological Processes in Sensory Integration	2
	More Than Five Senses	2
	Development and Sensory Integration	3
	Foundation for Learning and Behavior	3
	Prerequisite for Occupational Engagement	4
	Sensory Integration Today	4
	Application of Sensory Integration Principles in Therapeutic Practice	5
	Identifying Appropriate Candidates for Therapy	5
	Reasons for Referral	5
	Affected Areas of Occupation	6
	Academic Achievement	6
	Personal Identity	6
	Activities of Daily Living	6
	Behavior	7
	Social Participation	7
	Applying the Sensory Integration Principles in Assessment and Intervention	7
	Key Components of Sensory Integration Addressed During Assessment	8
	Areas of Sensory Integration and Praxis Addressed During Intervention	9
	Relevant Outcomes and Effectiveness	10
	Aspects of Function Expected to Change as a Result of Intervention	10
	Efficacy of Sensory Integration Principles and Methods in Intervention	10
	References and Additional Resources	12
Chapter 2	Evaluating Sensory Integration Function and Dysfunction	15
	Clinical Reasoning and the Selection of Sensory Integration as the Frame of Reference	15
	Informing the Assessment Process Through Sensory Integration Theory	15

Professional Considerations When Providing an Assessment	16
Creating the Client's Occupational Profile.	18
Evaluating Occupational Performance.	18
Evaluation of Sensory Integration and Praxis	19
Categories of Sensation	19
Components of Sensory Processing: Registration, Modulation, and Discrimination	20
Praxis	21
Analysis of Sensory Functions and Dysfunction.	21
Interpreting Behaviors From a Sensory Perspective	24
Measuring Sensory Integration and Praxis Using The Sensory Integration and Praxis Tests	25
Evaluating Sensory Integration and Praxis Using Clinical Observations.	25
Collecting Sensory and Praxis Histories	28
Putting It All Together.	29
References and Additional Resources	35
Chapter 3	
Planning Intervention: Bridging the Gap Between Assessment and Intervention	37
Guiding Intervention With Theory and Research Evidence-Based Practice	37
Planning Intervention Through Clinical Reasoning	38
Refining the Working Hypothesis.	39
The Use of Narrative	39
Naming and Framing Using the Sensory Integration Principles: Problem Setting and Problem Solving	40
Problem Setting.	40
Problem Solving.	40
The Three-Track Mind: Conditional, Interactive, and Procedural Thinking	41
Creating a Sensory-Based Intervention	45
Working With Sensory Registration Deficits	46
Working With Sensory Modulation Difficulties.	49
Working With Sensory Discrimination and Perceptual Deficits	52
Working With Posture and Bilateral Integration and Sequencing Deficits.	54
Working With Praxis Deficits.	55
Preparing the Report	57
References and Additional Resources	61

Chapter 4	Setting Goals and Objectives Around Sensory Integration Concerns	63
	Establishing Goals	63
	Interdisciplinary Goals	63
	Setting Goals Based on Sensory Integration Concerns	64
	Case Study: Johnny	67
	How Goals Guide Therapeutic Intervention	68
	Summary	70
	References	70
Chapter 5	Implementing Intervention	71
	Guiding Principles of Intervention Based on Sensory Integration Theory	72
	Typical Development	72
	Therapeutic and Occupational Scaffolding	72
	Sensory-Rich Environments	73
	Child-Directed Intervention	74
	Using Play as a Context for Intervention	74
	Tapping the Inner Drive	74
	Creating the Just-Right Challenge	74
	Eliciting the Adaptive Response	75
	Using Clinical Reasoning in Intervention	77
	Setting Up the Environment and Scaffolding the Child's Performance	77
	Facilitating the Adaptive Response	78
	Determining How Sensation Affects Motor and Praxis Skills	79
	Grading Sensory Challenges	79
	Grading Postural Control and Bilateral Integration and Sequencing Challenges	81
	Grading Praxis and Self-Organization Challenges	84
	Grading Self-Regulation Challenges to Optimize Occupational Performance	85
	Putting It All Together	85
	Determining the Effectiveness of Intervention	85
	References and Additional Resources	90
Chapter 6	Clinical Reasoning in Action: Designing Intervention	91
	Functional Problems Interfering With Engagement in Daily Occupations	93
	The Child's Diagnosis, Age, and Related Factors	93
	Methods Used to Gather Information	93
	Determining the Effects of the Child's Sensory Processing Difficulties	97
	Organizing Sensory Information	100
	Other Concerns	101

Including the Child's Interest and the Family's Priorities in the Intervention	101
Intervention Strategies	102
The Process and Context of Intervention	102
The Process and Context of Intervention for Caleb	102
When and Where	102
Who Provides the Intervention and How to Provide It	103
Measuring the Outcome of Intervention	104
References and Additional Resources	104
References That Support the Use of Sensory Integration With Children Who Have Cerebral Palsy	105
Chapter 7	
High-Risk Infants	107
Overview of the Population	107
Unique Considerations in Assessment of High-Risk Infants	107
Common Sensory Integrative-Related Behaviors of High-Risk Infants	107
Common Occupational Performance Difficulties	108
Key Considerations in Using a Sensory Integration Approach with High-Risk Infants	108
Determining Goodness of Fit	108
Physiological Instability	109
Signs of Autonomic Instability in Infants	109
Ability to Tolerate Stimuli	109
Ability to Regulate Arousal States	109
Sensory-Based Comforting Techniques for Restlessness and Poor Sleep Patterns	110
Key Considerations for Assessment	111
Assessment Strategies	111
The 4 A's: Arousal Level, Affect, Attention, and Actions (Williamson & Anzalone, 2001)	112
Assessments for Infants That Consider Sensory Integrative Needs	113
Key Intervention Principles	113
Creating a Good Fit Between the Caregiver and Child	114
Facilitating Environmental Affordances	114
Facilitating Appropriate Responses to Sensation to Achieve and Maintain Focused States of Arousal	115
Case Study: Kristina	116
Intervention for Kristina and Her Family	117
Assessments for Infants that Consider Sensory Integrative Needs	119
References and Additional Resources	119
References for Sleep Strategies	120

Chapter 8	Children With Autism Spectrum Disorders	121
	Overview of the Population	121
	Incidence	121
	Unique Considerations	122
	Common Sensory Integrative-Related Behaviors of Children With ASD . . .	123
	Common Occupational Performance Difficulties	123
	Key Considerations in Using a Sensory Integration Approach With Children With ASD	123
	Key Considerations for Assessment	124
	Assessment Strategies	124
	Assessment of Sensory Responsiveness	125
	Assessment of Sensory Preferences	125
	Assessment of Ability to Attach Meaning to Sensation and Use Sensation for Adaptive Behavior	125
	Assessment of Praxis	126
	Assessment of the Extent to Which Atypical Sensory Responsiveness Interferes With Engagement in Occupations	126
	Useful Assessment Tools	126
	Key Intervention Principles	127
	Interventions to Organize Behavior	127
	Improving Sensory Feedback From the Body	128
	Attaching Meaning to Sensation	128
	Provide a Foundation for Praxis	129
	Encourage Rapport and Social Interactions	129
	Incorporate Sensory Needs Into Daily Routines	129
	Case Study: Roberto	130
	Intervention for Roberto	131
	References and Additional Resources	132
Chapter 9	Sensory Integration and the Child With Cerebral Palsy	135
	Overview of the Population	135
	Unique Considerations	136
	Common Occupational Performance Difficulties	136
	Key Considerations When Utilizing a Sensory Integrative Approach With Children With CP	137
	Sensory Processing in Children With CP	137
	Sensory Feedback in Children With CP	137
	Sensory Modulation in Children With CP	137
	Praxis in Children With CP	138
	Components of Praxis	138

Effects of Lack of Sensory and Motor Experiences in Children With CP.....	138
General Considerations.....	138
Key Considerations for Assessment.....	139
Processing of Vestibular Input.....	140
Assessment of Sensory Feedback.....	141
Assessment of Sensory Modulation.....	141
Assessment of Praxis.....	141
Assessment of the Effects of Sensation on Movement and Posture....	142
Useful Assessment Tools.....	142
Key Intervention Principles.....	143
Provide Sensory-Rich Activities to Enhance Sensory Feedback.....	143
Attend to Positioning to Address Tone and Posture.....	144
Provide Normal Movement Activities to Enhance Awareness of the Sensory Aspects of Movement.....	144
Case Study: James.....	144
Intervention for James.....	147
References and Additional Resources.....	147

Chapter 10

Sensory Integration for Children With Visual Impairments, Including Blindness.....	149
Overview of the Population.....	149
Incidence.....	149
Unique Considerations.....	149
Common Sensory Integrative-Related Behaviors of Children With Visual Impairments.....	150
Common Occupational Performance Difficulties.....	151
Key Considerations for Using a Sensory Integrative Approach With Children Who Have Visual Impairment.....	151
Key Considerations for Assessment.....	153
Assessment Strategies.....	153
Assessment of Vestibular and Proprioceptive Functions.....	154
Assessment of Tactile Discrimination.....	154
Assessment of Sensory Modulation.....	154
Assessment of Praxis.....	154
Assessment of Spatial Perception and Spatial Orientation.....	155
Useful Assessment Tools.....	156
Key Intervention Principles.....	156
Incorporating Feedback from Other Sensory Channels.....	157
Improving Sensory Modulation.....	157
Improving Postural Control.....	157
Improving Fine Motor Skills.....	158

	Improving Praxis	158
	Improving Spatial Awareness, Spatial Orientation, and Comfort Moving Body Through Space	158
	Intervention Strategies	158
	Case Study: David	158
	Intervention for David	163
	Glossary of Vision Specialists	163
	References and Additional Resources	164
Chapter 11	Children Who Have Experienced Environmental Deprivation	171
	Overview of the Population	171
	Incidence	172
	Children Living in Poverty	172
	Unique Considerations	172
	Common Occupational Performance Difficulties	173
	Common Sensory Integrative-Related Behaviors of Children Who Experienced Environmental Deprivation	173
	Key Considerations for Assessment	173
	Assessment Strategies	174
	Assessment of Sensory Preferences and Sensitivities	174
	Assessment of Goodness of Fit Between the Child and Caregiver	174
	Assessment of Praxis	174
	Assessment of Oral-Sensory and Feeding Skills	175
	Useful Assessment Tools	175
	Key Intervention Principles	175
	Caregiver Education	176
	Improve Goodness of Fit Between Child and Caregiver	176
	Adapt the Environment	176
	Direct Intervention With Sensory Integration	177
	Decrease Oral Sensitivities	177
	Case Study: Audrey	177
	Intervention for Audrey and Her Family	179
	References and Additional Resources	180
Chapter 12	Fragile X Syndrome	181
	Overview of the Population	181
	Unique Considerations	181
	Common Characteristics of Individuals With FXS	181
	Common Occupational Performance Difficulties	184
	Key Considerations for Using a Sensory Integrative Approach With FXS	185

Key Considerations for Assessment	186
Assessment Strategies	186
Assessment of Sensory Discrimination	186
Assessment of Sensory Modulation	186
Assessment of Self-Regulation	186
Assessment of Praxis	187
Useful Assessment Tools	187
Key Intervention Principles	187
Improve Sensory Processing	188
Improve Self-Regulation	188
Improve Praxis	189
Case Study: Jeff	189
Intervention for Jeff	191
References and Additional Resources	193
Resources	194
Chapter 13 Sensational Ways to Play	195
Section 1: Sensory-Based Ways to Enrich the Child's Daily Environments	196
Activities Rich in Proprioceptive Sensation	196
Activities Rich in Pressure-Touch Sensation	203
Activities Rich in Tactile Sensation	203
Activities Rich in Vestibular Sensation	204
Activities Related to Praxis	207
Section 2: Imaginary Play Activities and Creative Play Themes	208
Creative Play Themes	208
Props and Equipment to Facilitate Creative Play	210
Section 3: Activities Using Specialized Sensory Integration Equipment	212
Ball/Bath Pit Activities	212
Barrel Activities	213
Bolster Swing Activities	213
Crash Pillow Activities	214
Flexion Disc Activities	215
Frog Swing Activities	215
Bouncing Ball and Ramp Activities	216
Inner Tube Activities	216
Activities for a Large Innertube Placed on the Ground	217
Moon Swing or Space Ball Activities	217
Net Swing Activities	218
Platform Swing Activities	218

Platform Glider Swing Activities	219
Ramps, Steps, and Ladder Activities	220
Rubber Strips or Rope Activities	221
Scooter and Ramp Activities	221
Spandex Hammock Activities	223
Suspended Inner Tube Swing Activities	223
Tactile Material Activities	224
Therapy Ball and Bolster Activities	225
Trampoline Activities	226
Weighted Balls/Beanbags Activities	227
Whale Activities	228
Vibrating Massager Activities	228
Visual Target Activities	229
Section 4: Child-Directed Strategies for Improved Sensory Modulation, Self-Regulation, Sensory Perception, and Discrimination	230
Section 5: Activity Websites and References	243
References	244
Appendix <i>Background Information and Occupational Profile</i>	245

List of Figures

Figure 2.1	Factors to Consider in Determining if Sensory Integration is the Appropriate Frame of Reference for Assessment and Intervention	16
Figure 3.1	Guiding Theories, Models, and Frameworks	39
Figure 3.2	Essential Components of Occupational Therapy Intervention That Contribute to Occupational Performance (Occupation) and Social Participation (Co-occupation)	45
Figure 3.3	Interrrelated Sensory Processes	46
Figure 5.1	Essential Components of Occupational Therapy Intervention That Contribute to Occupational Performance (Occupation) and Social Participation (Co-occupation)	71
Figure 6.1	Individual Sensory Integration Intervention Plan (ISIIP)	92
Figure 6.2	Targeting the Bull's Eye	95
Figure 6.3	Recorded Observations of Caleb's Behaviors With Possible Interpretations	96
Figure 6.4	Relationships of Sensory Input to Behavioral Responses	100
Figure 7.1	Factors to Consider in Determining if Sensory Integration is the Appropriate Frame of Reference for Assessment and Intervention	114

List of Tables

Table 1.1	Common Diagnostic Groups With Sensory Integrative Deficits	5
Table 1.2	Key Components of Sensory Integration	8
Table 1.3	Eliciting Adaptive Responses Through Scaffolding	9
Table 2.1	Assessment Questions That Guide Clinical Reasoning About Sensory Integrative Functions	19
Table 2.2	Assessment Questions About Sensory Processing/Integration	20
Table 2.3	Assessment Questions About Motor Abilities	21
Table 2.4	Assessment Questions About Praxis	22
Table 2.5	Individual and Multiple Sensory Contributions to Spatial and Motor Skills, Praxis, Arousal, Self-Regulation, and Attention.	23
Table 2.6	Detailed Descriptions of the <i>Sensory Integration and Praxis Tests (SIPT)</i>	26
Table 2.7	Observations of Behaviors Related to Sensory Integration.	27
Table 2.8	Occupational Therapy Process Focusing on Sensory Integration and Praxis.	30
Table 2.9	Occupational Therapy Process Focusing on Bryan’s Sensory Integration and Praxis.	31
Table 2.10	Influence of Sensation on Bryan’s Spatial and Motor Skills, Praxis, Arousal, and Attention	34
Table 3.1	Therapeutically Enhancing the Sensory Influence on Motor and Praxis Functions	42
Table 3.2	Application: Bryan’s Intervention Plan	43
Table 3.3	Contributions of Body-Centered Sensations	48
Table 3.4	Analysis of Sensory Modulation Factors	49
Table 3.5	Analysis of Sensory Modulation Factors.	50
Table 3.6	Designing Intervention to Address Sensory Modulation: Application Bryan.	51
Table 3.7	Designing Intervention to Address Sensory Discrimination	53
Table 3.8	Improving Postural and Bilateral Control	56
Table 3.9	Designing Interventions to Improve Praxis	57
Table 4.1	Example of Goals Charted for an Adult Who Has Difficulty Eating, Writing, and Driving.	64
Table 4.2	Example of Targets for Educationally-Related Goals.	65
Table 5.1	Intervention Using a Sensory Integrative Approach	75
Table 5.2	Scaffolding: Providing the Support and Freedom Necessary to Elicit the Adaptive Response.	77
Table 5.3	Linking Sensations With Motor and Praxis Skills to Guide Intervention	80
Table 5.4	Sensory Components and Their Contributions to Functions	82
Table 5.5	Facilitating Adaptive Responses in Postural and Bilateral Control	83
Table 5.6	Facilitating Adaptive Responses in Praxis.	83
Table 5.7	Implementing Bryan’s Intervention Plan: Testing the Working Hypothesis	86

Table 6.1	Examples of Parent’s Reports That Suggest Difficulty Processing Sensory Information	94
Table 6.2	Assessment Results and Possible Affects of Sensory Processing	98
Table 6.3	Organizing Information Gathered in the Assessment to Determine Hyporesponsiveness/Poor Registration, Discrimination, or Over-responsive Deficits	99
Table 7.1	Sensory Input/Activities for Facilitation/Arousal, Calming, and Organizing/Modulating	116
Table 10.1	Common Difficulties for Children with Visual Impairment and Suggested Environmental Modifications	159
Table 10.2	Diagnosis: Retinoblastoma	165
Table 10.3	Diagnosis: Retinopathy of Prematurity	166
Table 10.4	Diagnosis: Optic Nerve Damage (Hypoplasia, Dysplasia, Degeneration, etc.)	167
Table 10.5	Diagnosis: Dual or Multiple Sensory Impairment (i.e., deaf and blind)	168
