## Part I. Theoretical Foundations

1. Sensory Integration Revisited: A Philosophy of Practice  
   Susan Spitzer, M.A., OTR  
   The Necessity of Integrated Sensation  
   The Adaptive Response and Self-Direction  
   The Dynamic Process of Sensory Integration  
   The Role of Sensory Integration in Development  
   Building Occupational Performance  
   Sensory Integration and Daily Occupations  
   Meeting Challenges Successfully: The Adaptive Response  
   Meeting Challenges Successfully: Using Sensory Integration in Conjunction  
   Meeting Challenges Successfully: With Other Approaches  
   Outcomes and Effectiveness of Intervention  
   Efficacy Research  
   References  

2. Neuroplasticity and the Environment: Implications for Sensory Integration  
   S. Essic Jacobs, Ph.D., OTR  
   Mary I. Schneider, Ph.D., OTR  
   The Organism-Environment Interaction  
   Brain Growth: A Protracted Process  
   Genes and Environment  
   Synaptogenesis and Synapse Elimination  
   The Role of Neural Activity in Synapse Connectivity  
   Hebb Synapse  
   Long-Term Potentiation (LTP)  
   Properties of LTP  
   The Role of Behavior on Synapse Modification  
   Experience-Dependent Cortical Plasticity  
   The Effects of Prenatal Stress on Function  
   Alcohol and Stress During the Prenatal Period  
   Implications for Sensory Integration

Applications to Occupational Therapy ................................... 196
References ........................................................................... 199
Additional Readings ............................................................. 200

Part II. Clinical Applications

11. Clinical Reasoning and the Use of Narrative in Sensory Integration Assessment and Intervention ............................................ 203
Janice Posatery Burke, Ph.D., OTR-L, FAOTA

Introduction ........................................................................... 203
Clinical Reasoning as it Looks in Action .................................. 204
Clinical Reasoning in Occupational Therapy ......................... 206
Applying Principles to Sensory Integration ......................... 207
   Case Study: Finding Ways for Josh to “Fit In” .................... 207
Clinical Reasoning Using a Sensory Integration Perspective ..... 208
   The Role of Theory in Clinical Reasoning ....................... 208
   Narrative ........................................................................... 209
   The Three-Track Mind ....................................................... 211
   Naming and Framing .......................................................... 212
   Reflection in Action .......................................................... 212
 References ............................................................................ 213

12. Assessment of Sensory Integration and Praxis .................. 215
Mary-Margaret Windsor, Sc.D., OTR-L
Susanne Smith Roley, M.S., OTR
Stacey Szklut, M.S., OTR-L

Evaluating Sensory Integration and Praxis Within the Context of Occupational Therapy ...................................................... 216
Identification ........................................................................ 217
   Informal Assessments ....................................................... 217
   Formal Assessments .......................................................... 218
   Interpreting Deficits in Sensory Integration .................... 219
Documentation: Relationship of the Model of Function to Sensory Integration ................................................................. 221
   Bryan .............................................................................. 224
   Appraisal/Reappraisal: The Dynamic Assessment of Sensory Integration ................................................................. 227

References ............................................................................ 230
Additional Readings ............................................................. 234
Appendix 12-A A Few Words About Formal Evaluations .......... 235
Appendix 12-B OTA-Watertown Clinical Assessment Worksheet ......................................................................................... 237
Appendix 12-C Structured Clinical Observations: Application to Diverse Populations .......................................................... 243
Appendix 12-D Overview of Selected Sensory Integration Assessment Instruments ........................................................................ 245

13. Clinical Applications in Sensory Modulation Dysfunction: Assessment and Intervention Considerations .................... 247
Lucy Jane Miller, Ph.D., OTR
Clare Summers, M.A., OTR

The Ecological Model of Sensory Modulation ......................... 247
The Assessment and Intervention Process in SMD ................. 248
   The Assessment Process .................................................... 248
   The Intervention Process With SMD ................................. 249
Case Study: Kamon ................................................................ 252
   Referral Issues and Assessments ...................................... 252
   External Dimensions Affecting Function ......................... 252
   Internal Dimensions Affecting Function ......................... 253
   Kamon’s Intervention ....................................................... 254
   Outcomes of Intervention for Kamon ............................... 256
Case Study: Stevie .................................................................. 257
   Referral Issues and Assessments ...................................... 257
   External Dimensions Affecting Function ......................... 257
   Internal Dimensions Affecting Function ......................... 257
   Stevie’s Intervention ....................................................... 259
   Outcomes of Intervention for Stevie ................................. 261
References ............................................................................ 264
Appendix 13A Description of Assessments Used in Evaluation of SMD at the STAR Center at The Children's Hospital in Denver, CO

Appendix 13B SMD Behavior During Testing Checklist

Appendix 13C Parent Interview for Children With SMD

Appendix 13D Sample Goal Attainment Scale for Kamon

14. Sensory Integration With High-Risk Infants and Young Children
    Roseann C. Schaaf, M.Ed., OTR/L, FAOTA
    Marie E. Anzalone, Sc.D., OTR, FAOTA

The Unique Opportunities and Challenges of Infancy and Early Childhood

A Model for Viewing the Infant From the Sensory Integration Perspective

Sensory Responsivity

Sensory Threshold and Behavioral Organization

A Continuum of Responsivity

Behavioral Organization:
The Four As

Arousal

Attention

Affect

Action

Problem Setting: Assessment of High-Risk Infants and Young Children With Sensory Integrative Dysfunction

The Components of Assessment

Assessment of the Child

Assessment of the Physical Environment

Assessment of the Social Environment

Shaping Outcomes: Organizing Assessment Data Into an Intervention Plan

Helping Parents Understand Their Infant

Facilitating Goodness-of-fit Between Child and Environment

Case Study: Sarah

Direct Sensory Integrative Intervention With the Child

Basic Principles of Sensory Integrative Intervention for Infants and Young Children

Using Play With Young Children

References

Additional Readings

Appendix 14-A Selected Assessment Instruments

Appendix 14-B The Sensory Integration Observation Guide

15. Sensory Integration and Visual Deficits, Including Blindness
    Susanne Smith Roley, M.S., OTR
    Colleen Schneck, Sc.D., OTR, FAOTA

The Holistic Nature of Vision

Visual Components

Functional Vision Deficits

Visual Dysfunction in Children With Disabilities

Types and Incidence of Visual Dysfunction

Coexisting Disorders in Children With Disabilities

Vision Impairment and Blindness

Role of Sensory Integration in Vision

Levels of Sensory Processing

Intersensory Interactions

Dan

Analysis of Space

Praxis

Visual Impairment, Blindness, and Sensory Integration

Michael

Commonalities Between Individuals With Blindness and Autistic Disorder

Culver

Assessment of Children With Visual Impairment and Blindness
Ramifications of Severe Visual Impairment and Blindness ........ 333
Attachment ..................... 333
