Preface xix

CHAPTER 1
Anatomy, Neuroanatomy, and Physiology of the Speech Mechanism 1

Respiration: Structures and Processes 1
  Respiration Patterns During Speech Production
  Framework of Respiration 2
  Muscles of Respiration 6

Phonation: Structures and Processes 8
  Larynx 8
  Laryngeal Structures and Cartilages 9
  Intrinsic Laryngeal Muscles 10
  Extrinsic Laryngeal Muscles 12
  Vocal Folds 12
  Physiology of Phonation 13
  Neuroanatomy of the Vocal Mechanism 14

Resonation and Articulation: Structures and Processes 15
  Fundamentals of Resonation 15
  Fundamentals of Articulation 17

Neuroanatomy and Neurophysiology: The Nervous System 28

  Neurons and Neural Transmission 28
    Anatomy and Physiology of Nerve Cells 28

  The Peripheral and Autonomic Nervous Systems 31
    Peripheral Nervous System 31
    Autonomic Nervous System 38
The Central Nervous System  40
  Basic Principles  41
  The Brainstem  41
  Reticular Activating System  43
  Diencephalon  43
  Basal Ganglia  44
  The Cerebellum  45
  The Cerebrum  46
  Pyramidal System  51
  Extrapyramidal System  54
  Connecting Fibers in the Brain  55
  The Cerebral Ventricles  56
  Protective Layers of the Brain  57
  Cerebral Blood Supply  57

Chapter Highlights  61
Study and Review Questions  62
References and Recommended Readings  66
Study and Review Answers  66

CHAPTER 2
Physiological and Acoustic Phonetics: A Speech Science Foundation  69
  Basic Principles and Definitions  69
    Definitions  70
    Anatomy and Physiology: A Brief Review  71

  Phonetic Transcription  72
    The International Phonetic Alphabet  72
    Broad Phonetic Transcription  72
    Narrow Phonetic Transcription  72

  Production of Segmentals: Consonants and Vowels  75
    Consonants and Vowels: The Syllable as a Unit  75
    Classification Systems  76
    Consonants  78
    Vowels  84

  The Effects of Context in Speech Sound Production  88
    Dynamics of Speech Production  88
    Suprasegmentals  88

Speech Science: Physiological Phonetics, Acoustic Phonetics, and Speech Perception  90
  Acoustics: Basic Definitions  90
Introduction to the Study of Sound and Acoustic Analysis of Speech 92
  Sound Wave Generation and Propagation 93
  Frequency and Pitch 93
  Amplitude and Loudness 94
  Sound Pressure Level and Hearing Level 94
  Introduction to the Acoustic Analysis of Speech 95

Chapter Highlights 97

Study and Review Questions 98

References and Recommended Readings 101

Study and Review Answers 102

CHAPTER 3

Language Development in Children 105

Terms and Definitions 105
  Morphology 106
  Syntax 107
  Semantics 108
  Pragmatics 109

Normal Language Development: Developmental Milestones 111
  Role of the Caregiver in Language Development 111
  Birth to 1 Year 112
  1–2 Years 114
  2–3 Years 117
  3–4 Years 118
  4–5 Years 121
  5–6 Years 123
  6–7 Years 125
  7–8 Years 126
  Development of Literacy Milestones 127
  Language Development and Education in the School-Age Years 127

Theories of Language Development 128
  Behavioral Theory 129
  Nativist Theory 130
  Cognitive Theory 132
  Information-Processing Theory 134
  Social Interactionism Theory 136

Chapter Highlights 138

Study and Review Questions 139
CONTENTS

Distinctive Features Paradigm 209
Place-Voice-Manner Paradigm 209

Acquisition of Articulatory and Phonological Skills: Typical Development 211
Theories of Development 211
Infant Development: Perception and Production 214
Typical Articulation Development in Children 215
Typical Phonological Development in Children 217

Speech Sound Disorders 219
General Factors Related to Speech Sound Disorders 219
Description of Articulatory Errors 220
Organically Based Disorders 221

Assessment of Speech Sound Disorders 225
Screening 226
General Assessment Objectives 226
Related Assessment Objectives 226
Assessment Procedures 227
Specific Components of an Assessment 228
Scoring and Analysis of Assessment Data 230

Treatment of Speech Sound Disorders 232
General Considerations in Treatment 232
Motor-Based Approaches 233
Linguistic Approaches 235
Phonological Awareness Treatment 238

Adults Who Speak English as a Foreign Language 239
Principles of Assessment 239
Principles of Accent Training 240

Chapter Highlights 242
Study and Review Questions 243
References and Recommended Readings 247
Study and Review Answers 252

CHAPTER 6

Fluency and Its Disorders 253

Fluency and Stuttering: An Overview 253
Definition and Description of Fluency 254
Definition and Description of Stuttering 254
Forms of Dysfluencies 257
Theoretical and Clinical Significance of Dysfluencies 258

The Dysarthrias 369
  - Definition of the Dysarthrias 369
  - Neuropathology of the Dysarthrias 369
  - Communicative Disorders Associated with Dysarthria 369
  - Types of Dysarthria 370
  - Assessment of the Dysarthrias 374
  - Treatment of the Dysarthrias 375

Dementia 377
  - Definition and Classification of Dementia 377
  - Dementia of the Alzheimer Type (DAT) 378
  - Frontotemporal Dementia (Including Pick’s Disease) 379
  - Dementia Associated with Parkinson’s Disease 380
  - Dementia Associated with Huntington’s Disease 381
  - Infectious Dementia 382
  - Other Forms of Dementia 383
  - Assessment of Dementia 384
  - Clinical Management of Dementia 384

Right Hemisphere Syndrome 386
  - Foundational Concepts 386
  - Symptoms of Right Hemisphere Syndrome 387
  - Assessment of Right Hemisphere Syndrome 388
  - Treatment of Right Hemisphere Syndrome 389

Traumatic Brain Injury (TBI) 390
  - Definition and Incidence of TBI 390
  - Common Causes of TBI 391
  - Types and Consequences of TBI 391
  - General Assessment of Patients with TBI 392
  - Assessment of Communicative Deficits Associated with TBI 393
  - Treatment of Patients with TBI 393

Swallowing Disorders 395
  - Nature and Etiology of Swallowing Disorders 396
  - Normal and Disordered Swallow 396
  - Assessment of Swallowing Disorders 398
  - Treatment of Swallowing Disorders 399

Chapter Highlights 403

Study and Review Questions 404

References and Recommended Readings 408

Study and Review Answers 413
CHAPTER 9
Communication Disorders in Multicultural Populations 415

Foundational Issues 416
  Demographic Data 416
  General Cultural Considerations 416
  ASHA Guidelines Regarding Multicultural Issues 418

Speech–Language Characteristics of CLD Clients 419
  Dialects of American English 419
  African American English 420
  Characteristics of AAE Morphology, Syntax, and Articulation 421
  Spanish-Influenced English 422
  English Influenced by Asian Languages 427

Language Differences and Language-Learning Disabilities 429
  Differentiating Language Differences From Language-Learning Disabilities 430
  Acquiring a Second Language 431
  Basic Interpersonal Communication Skills and Cognitive–Academic Language Proficiency 434

Assessment of CLD Clients 436
  Legal Considerations 437
  Considerations in the Use of Standardized Tests 438
  Alternatives to Standardized Tests 440
  Working with Interpreters in the Assessment Process 442

Treatment Considerations in Service Delivery to CLD Clients 443
  Children with Language-Learning Disabilities 444
  Prevalence and Incidence Rates of Medical Conditions and Communication Disorders 445
  Potential Sociocultural and Linguistic Barriers to Service Delivery 446
  Adults with Neurologically Based Disorders of Communication 446

Chapter Highlights 450

Study and Review Questions 451

References and Recommended Readings 457

Study and Review Answers 461

CHAPTER 10
Audiology and Hearing Disorders 463

Anatomy and Physiology of Hearing 464
  The Outer Ear 464
  The Middle Ear 464
  The Inner Ear 465
  The Auditory Nervous System 466
Acoustics: Sound and Its Perception 468
The Source of Sound 468
Sound Waves 469
Frequency and Intensity 470
Sound Pressure Level and Hearing Level 471

The Nature and Etiology of Hearing Loss 472
Normal Hearing 472
Nature of Hearing Impairment 473
Conductive Hearing Loss 473
Sensorineural Hearing Loss 476
Mixed Hearing Loss 480
Auditory Nervous System Impairments 482

Assessment of Hearing Impairment 485
Audiometry: Basic Principles 485
Pure-Tone Audiometry 485
Speech Audiometry 486
Acoustic Immitance 486
Other Methods 487
Hearing Screening 488
Assessment of Infants and Children 488
Interpretation of Hearing Test Results 489

Management of Hearing Impairment 491
Communication Disorders of People with Hearing Impairment 491
Aural Rehabilitation: Basic Principles 495
Amplification 495
Communication Training 500

Chapter Highlights 505
Study and Review Questions 506
References and Recommended Readings 510
Study and Review Answers 512

CHAPTER 11
Assessment and Treatment: Principles of Evidence-Based Practice 515
Evidence-Based Practice in Speech-Language Pathology 515
Standard Assessment Procedures 516
Screening 517
Case History 517
Hearing Screening 520
Orofacial Examination 520
Interview 520
Speech and Language Sample 521
Obtaining Related Assessment Data 523

Principles of Standardized Assessment 524
Nature and Advantages of Standardized Assessment 524
Limitations of Standardized Tests 525
Prudent Use of Standardized Tests 525
Types of Scores in Standardized Assessment 526
Validity and Reliability of Standardized Tests 527

Rating Scales, Questionnaires, and Developmental Inventories 530
Rating Scales 531
Questionnaires 531
Developmental Inventories 532

Alternative Assessment Approaches 532
Functional Assessment 532
Client-Specific Assessment 534
Criterion-Referenced Assessment 534
Authentic Assessment 535
Dynamic Assessment 535
Portfolio Assessment 535
Comprehensive and Integrated Assessment 535

Treatment of Communication Disorders: Basic Concepts 537
Treatment: Definition 537
A Treatment Paradigm for Communication Disorders 538
Basic Treatment Terms 539
Reinforcers and Reinforcement: Basic Definitions 542

An Overview of the Treatment Process 545
Selection of Treatment Targets 545
Treatment Sequence 547
Maintenance Program 548
Follow-Up 549
Booster Treatment 549

A General Outline of a Treatment Program 550
General Outline 550

Cultural–Linguistic Considerations in Assessment and Treatment 551
The Need for Individualized Assessment and Treatment 551

Chapter Highlights 553
Study and Review Questions 554
References and Recommended Readings 558
Study and Review Answers 560
CHAPTER 12

Research Design and Statistics: A Foundation for Clinical Science  563

Essentials of the Scientific Method  563
  The Philosophy of Science: Basic Precepts  564
  Validity of Measurements  566
  Reliability of Measurements  566

Experimental Research  568
  Foundational Concepts  568
  Group Designs of Research  569
  Single-Subject Designs  571

Varieties of Descriptive Research  576
  Foundational Concepts  576
  Ethnographic Research  580

Evaluation of Research  581
  Internal Validity  581
  External Validity  584
  Levels of Evidence for Evidence-Based Practice  585

Data Organization and Analysis: Principles of Statistics  587
  Foundational Concepts  587
  Statistical Techniques for Organizing Data  588
  Types of Measurement Scales  590

Chapter Highlights  592

Study and Review Questions  593

References and Recommended Readings  598

Study and Review Answers  599

CHAPTER 13

Special Topics in Speech–Language Pathology  601

Counseling  601
  Qualities Necessary for Effective Counseling  602
  Approaches to Counseling  602
  Special Issues in Counseling  606
  Reactions and Emotions Related to Communication Disorders  606
  Defense Mechanisms  607

Medical Speech–Language Pathology  608
  Practice and Responsibilities of Speech–Language Pathologists  609
  Medical Team Specialists and Their Roles  610
  Infectious Disease Control  612
Working with HIV and AIDS Patients 613
Medical Imaging Techniques 614

Craniofacial Anomalies and Genetic Syndromes 615
Craniofacial Anomalies 616
Cleft Lip 616
Cleft Palate 616
Genetic Syndromes 624

Medically Fragile Infants 632
General Facts 632

Chapter Highlights 636
Study and Review Questions 637
References and Recommended Readings 641
Study and Review Answers 644

CHAPTER 14
Professional Issues 647

ASHA and the Professions 647
The American Speech-Language-Hearing Association 648
The Professions of Speech-Language Pathology and Audiology 651
The Scope of Practice: Speech-Language Pathology 651
ASHA Accreditation 652

Issues in Certification and Licensure 653
Clinical Certification 653
Speech–Language Pathology Assistants 655
State Regulation of the Profession 656

Legislative Regulation of the Profession 656
Federal Legislation Affecting School Settings 657
Individuals with Disabilities Education Act (IDEA) 658
Federal Legislation Affecting Employment Settings 658
Federal Legislation Affecting Health-Care Settings 659
Future Trends 661

Chapter Highlights 662
Study and Review Questions 662
References and Recommended Readings 665
Study and Review Answers 666
APPENDIX  667

Nature and Purpose of the PRAXIS  667
Study Tips for Preparing for the PRAXIS  673
Tips for Taking the PRAXIS  674
References and Recommended Readings  675
