Antidepressants, 155
Aponeuroses, 47
Arthrokinematics, 4, 10, 11–12, 199–200
Assessment of myofascial system. See Evaluation of
myofascial system
ASTYM (augmented soft tissue manipulation), 85
Augmented soft tissue manipulation (ASTYM), 85
Autonomic approaches to myofascial manipulation, 17–21
Autonomic aspects of myofascial pain syndrome,
138–139, 144–145
Autonomic effects of massage, 83
Avicenna, 6
Axial flexion of cervical spine, 305–306, 307
Back pain. See Low-back pain (LBP)
Barker, Herbert, 8
Biceps
biceps stretch, 300
transverse fascial stretch of, 299–300
Biceps stretch, 300
Bilateral sacral release, 222–223
Bilateral upper thoracic release, 283–284
Bindegewebsmassage, 18–20
Bindegewebsmassage-type stroke, 205–207
Biomechanics
of connective tissue, 4, 40–54
of junctional zones, 59–63
of muscles, 56–58
Biotensegrity of musculoskeletal system, 61–63
Blood flow, massage’s effects on, 80–82
Body posture. See Postural and structural
evaluation
Bohm, Max, 20
Bone setters (17th–19th centuries), 6–8
Bone clearing
of iliac crest, 217–219
of tibia, 271–274
Borthwick, E. K., 91
Cells of connective tissue, 35–37
Central sensitization
fibromyalgia, 153–154
myofascial pain syndrome, 142–144
Cervical cervicothoracic myofascia, diagonal stretch
of, 308
Cervical laminar release, 306–308
Cervical spine
axial flexion of, 305–306, 307
cervical laminar release, 306–308
diagonal stretch of cervical cervicothoracic myo-
fascia, 308
Cervical spine (continued)
elongation of paravertebral muscles, 305
evaluation of, 190–191
frontal facial decompression, 311–312
manipulation of subcranial and OA myofascia, 308–309
masseter manipulation, 309–310
retro-orbital decompression, 312–313
sternocleidomastoid (SCM) muscle play, 313–314
temporalis manipulation, 310–311
therapeutic techniques, 305–314
Cervicothoracic area, muscle agonist/antagonist
groups of, 192
Chila, Anthony, 24
Chiropractic, 9–10, 12, 155
Chisel grip, 202, 203
Chondroitin, 38
Chronic fatigue syndrome, 151
Citalopram, 155
Collagen
in basement membrane, 59
biosynthesis of, 38–40
critical interfiber distance, 74
cross-links and, 71, 74, 75
in dense irregular connective tissue, 47
in dense regular connective tissue, 46
diagram of, 34
distribution of, 85–86
in extracellular matrix, 35, 37–40
half-life of, 45, 74
in loose irregular connective tissue, 48
lubrication of, 74
massage’s effects on, 83–86
response of, to immobilization, 74–75
types of, 35, 38
viscoelastic model of connective tissue and, 43, 45
weave pattern of, 43
wound healing and, 71–72, 83–85
Compression, definition of, 40
Compressive testing of spine, 195
Connective tissue
afferent neurology of, 92–105
biomechanics of, 40–54
cells of, 35–37
classification of, 47
collagen, 35, 37–40
contractility of, 48–49
dense irregular connective tissue, 47
dense regular connective tissue, 46–47
diagram of, 34
eextracellular matrix, 35, 37–40
fascia as force transmitter, 50–54
fibrosis cycle and decreasing mobility in, 72–73, 77–78
functions of, 33–34
general characteristics of, and definitions of
terms, 40–46
histology of, 34–40
insertion of, to bone, 59–61
loose irregular connective tissue, 47–48
pathophysiology of soft tissue repair, 69–72
percentage of body weight and storage of water content by, 33
photomicrograph of, 37
plasticity of, 50
response of, to immobilization, 73–80
stress–strain curve, 41, 44–45
types of, 34
types of injuries to, 40
viscoelastic model of, 41–45
Wolff’s law, 45
Connective tissue massage (CTM), 18–20
Contractility of connective tissue, 48–49
Contracture of muscles, 50–51, 131, 139–140
Contractures of trigger points, 131, 140–142
Convex/concave rule for joint mobilization, 12
Creep and relaxation, 43–44
Critical interfiber distance, 74
Cross-friction of gastrocnemius–soleus musculotendinous junction, 275–276
Cross-friction of piriformis insertion, 263–264
Cross-links, 71, 74, 75
CTM (connective tissue massage), 18–20
Cutaneous pain, 125
Cyclobenzaprine, 155
Cyriax, Edgar, 10
Cyriax, James, 10–12, 184
Dense irregular connective tissue, 47
Dense regular connective tissue, 46–47
Diagnosis. See also Evaluation of myofascial system of
dysfunction, 183–184
of fibromyalgia (FMS), 149–152, 153
in modern times, 10–13
of myofascial pain syndrome, 129–132
of soft tissue lesion and mechanical dysfunction, 127
Diagonal stretch of cervical cervicothoracic myofascia, 308
Diaphragm release, 241–244
Diaphragmatic techniques, 119–120

Distraction, 12
Dry needling. See Physical therapy dry needling
Duloxetine, 155
Dupuytren disease, 50
Dysfunction
criteria for somatic dysfunction, 127
definition of, 183
definition of somatic dysfunction, 183
diagnosis of, 183–184
motor and mechanical dysfunction in myofascial pain syndrome, 133–135
myofascial pain dysfunction syndrome, 128
sensory dysfunction in myofascial pain syndrome, 135–138
soft tissue lesion and mechanical dysfunction, 126–128
somatic dysfunction, 127, 183

Ebner, Maria, 18
Effleurage massage techniques, 20
Elastin, 35, 37, 38
Electrogenic muscle tone, 112–113
Electromyograms (EMGs), 183

Elongation
    anterolateral fascial elongation, 288–289
    lateral elongation of peroneal tissue, 274–275
    lateral elongation of upper thoracic area, 279–281
    lower extremity/posterior quadrant fascial elongation, 276–277
    medial–lateral fascial elongation, 209–211
    of paravertebral muscles, 305
    in sequencing of treatment, 201
    side-bending elongation quadratus stretch, 225–229
    upper extremity and posterior quadrant fascial elongation, 296–298

EMGs (electromyograms), 183

End feel, 11
Endomysium, 56
Endplate (integrated) hypothesis, 147
Energy crisis hypothesis, 140–141
Epimysium, 56

Erector spinae
    “ironing” of, 216–217
    long axis laminar release, 212–214
    muscle play of, 214–216
    quadratus lateral erector spinae release, 224–225, 226

Erector spinae muscle play, 120–121

Evaluation of myofascial system. See also Diagnosis
    active movement analysis, 193–194
cervical spine, 190–191
compresive testing of spine, 195
forward-head posture, 186–190
history of, 184
lateral shear examination, 239–240
layer palpation, 195–197
lumbar spine, 191–193
observation of posture, 185–193
palpatory examination, 195–197

postural and structural evaluation, 185–193
questions for, 184
skin rolling, 196, 197
thoracic spine, 191, 192

Exercise
    for fibromyalgia, 155–157
    for low-back pain (LBP), 13
    Extension exercises, 4–6

Extracelular matrix, 35, 37–40

Facet hypothesis, 10
Fascia as force transmitter, 50–54
Fascial contraction loop, 50, 51
Fascial sheaths, 47
Fasciculi, 56
FCU (flexor carpi ulnaris), 53
Feldenkrais method, 24, 27–28, 201
Fibroblastic phase of wound healing, 71–72
Fibroblasts
    contractility of connective tissue, 48–49
description and functions of, 35–36
during healing process, 71–73, 83–85
massage’s effects on, during healing process, 83–85

Fibrocytes, 35
Fibromyalgia (FMS)
    comorbidities with, 151
definition of, 126, 149
diagnosis of, 149–152, 153
incidence of, 149
management of, 155–157
nonpharmacological management of, 155–157
pathogenesis of, 152–154
pharmacological management of, 155
tender points, 150–151
treatment costs for, 149
Fibrosis cycle, 72–73, 77–78
Fibrositis, 149
First rib shoulder depression technique, 282–283
Flexor carpi ulnaris (FCU), 53
Fluoroscopy, 12–13
Fluoxetine, 155
FMS. See Fibromyalgia (FMS)

Forearm
    forearm “ironing,” 300–301
    muscle splay of, 301–303
transverse muscle bending of, 303

Forearm “ironing,” 300–301

Forward-bending laminar release, 230–232
Forward-bending laminar release—quadruped, 232–235
Forward-bending laminar release—sitting, 236–237
Forward-head posture, 186–190

Free nerve endings, 93
Frontal facial decompression, 311–312
Frozen shoulder, 50
Fuller, Buckminster, 13, 61–62
Functional imaging techniques, 154
GAGs (glycosaminoglycans), 35, 38, 113–114, 116
Gain adjustment of muscle spindles, 98–99
Galen, 6, 91
Gastrocnemius–soleus, transverse muscle play of, 268–270
Gastrocnemius–soleus musculotendinous junction, cross-friction of, 275–276
Gel–sol principle, 50
Ghormley, R. K., 10
Gluteal fascial plane manipulation, 262–263
Golgi-Mazzoni receptors, 102, 108, 118
Golgi tendon organs (GTOs), 92, 93, 99–101, 107–108, 118, 120
Granulation phase of wound healing, 70–71
Greater trochanter rocking, 248–249, 250
Ground substance, 35, 37, 38, 74
GTOs (Golgi tendon organs), 92, 93, 99–101, 107–108, 118, 120
Hair receptors, 93, 96–97
Half-chisel grip, 202, 204
Hamstring
  hamstring manipulation, 258–259
  longitudinal stroking, 258
  proximal hamstring stretch, 259–261
  splay technique, 258–259
  transverse muscle play of hamstrings, 267–268
  transverse muscle play of hamstrings and adductor magnus: posterior-to-anterior pressure, 268
Hamstring manipulation, 258–259
Hands
  care and protection of, 202–205
  chisel grip, 202, 203
  half-chisel grip, 202, 204
  lubricant for, 205
  octopus grip, 202, 203
  power grip, 204
  washing of, 204–205
Hippocrates, 4–6, 9
Hips
  hip flexion, external rotation, adduction, 256–258
  hip flexion/adduction, 255–256
  hold–relax stretch of, 255–258
Histology
  of connective tissue, 34–40
  of junctional zones, 58–59
  of muscles, 54–56
Histopathology
  fibrosis cycle and decreasing mobility in connective tissue, 72–73, 77–78
  of myofascia, 69–80
  pathophysiology of soft tissue repair, 69–72
  response of myofascial tissue to immobilization, 73–80
  scar formation, 77–78
Historical basis for evaluation of myofascial system, 184
Historical basis for myofascial manipulation
  ancient times, 3–6

Lateral elongation
of peroneal tissue, 274–275
of upper thoracic area, 279–281
Lateral fascial distraction of tibia, 274
Lateral sacral release, 221–222
Lateral shear correction, 239–241
Lateral shear examination, 239–240
Layer palpation, 195–197
Layered syndrome, 189, 190, 191
LBP. See Low-back pain (LBP)
"Legs carry trunk" model, 52
Ligaments
as dense regular connective tissue, 46–47
function of, 47
insertion of, to bone, 59–61
Long axis distraction of superficial connective tissue, 207–209
Long axis laminar release, 212–214
Longitudinal posterior hip release, 232
Loose irregular connective tissue, 47–48
Low-back pain (LBP)
causes of, 10
exercise for, 13
fibriotic process and decreasing mobility in connective tissue, 73
incidence of, 13
Lower crossed syndrome, 188–189
Lower extremity/posterior quadrant fascial elongation, 276–277
Lubricant for hands, 205
Lumbar myofascial roll, 237–239
Lumbar spine
bilateral sacral release, 222–223
bindgewebsmassage-type stroke, 205–207
bony clearing of iliac crest, 217–219
diaphragm release, 241–244
evaluation of, 191–193
forward-bending laminar release, 230–232
forward-bending laminar release—quadruped, 232–235
forward-bending laminar release—sitting, 236–237
iliac crest release, 219–221
iliacus release, 246–248
"ironing" of erector spinae muscle group, 216–217
L3 deep soft tissue manipulation, 229–230
lateral sacral release, 221–222
lateral shear correction, 239–241
long axis distraction of superficial connective tissue, 207–209
long axis laminar release, 212–214
longitudinal posterior hip release, 232
lumbar myofascial roll, 237–239
medial–lateral fascial elongation, 209–211
medial–lateral pull-away, 222–224
muscle play of erector spinae, 214–216
psoas release, 244–246
quadratus lateral erector spinae release, 224–225, 226
side-bending elongation quadratus stretch, 225–229
therapeutic techniques, 205–248
tissue rolling, 196, 197, 211–212
Lumbar/lumbopelvic area, muscle agonist/antagonist groups of, 192
Lumbopelvic area, muscle agonist/antagonist groups of, 192
Lumbopelvic/lower quarter area
bony clearing of tibia, 271–274
cross-friction of gastrocnemius–soleus musculotendinous junction, 275–276
cross-friction of piriformis insertion, 263–264
gluteal fascial plane manipulation, 262–263
greater trochanter rocking, 248–249, 250
hamstring manipulation, 258–259
hold–relax stretch of hip, 255–258
iliotibial band (ITB) paratrochanteric manipulation, 253–255
ischial tuberosity cross-friction, 261
lateral elongation of peroneal tissue, 274–275
lateral fascial distraction of tibia, 274
lower extremity/posterior quadrant fascial elongation, 276–277
piriformis release in prone, 264–266
plantar fascia manipulation, 278–279
proximal hamstring stretch, 259–261
therapeutic techniques, 248–279
transverse muscle play of gastrocnemius–soleus, 268–270
transverse muscle play of hamstrings, 267–268
transverse muscle play of hamstrings and adductor magnus: posterior-to-anterior pressure, 268
transverse muscle play of quadriceps, 249–252
Macrophages, 35, 36
Magnetic resonance imaging (MRI), 154, 183

trigger point contractures, 140–142
Myofascial release, 24–25
Myofascial trigger point release (infraspinatur) flat palpation, 292–294
Myofascial trigger point release (upper trapezius) pincer palpation, 294
Myofascial trigger points. See Trigger points
Myofibroblasts, 35, 36, 48–49, 72–73
Myofilaments, 54–56, 59
Myogelosis, 128
Myotendinous junction biomechanics of, 59–63
biotensility of musculoskeletal system, 61–63
connective tissue insertion to bone, 59–61
histology of, 58–59
Neural mechanisms, 4
Nociception and nociceptors, 104–105, 111, 125. See also Muscle pain syndromes; Pain
Nonthrust articulation, 12
Nontraumatized connective tissue, response of, to immobilization, 74–77
Nuclear bag fibers, 97
Nuclear bag spindles, 97
Nuclear chain fibers, 97–98
OA myofascia, manipulation of, 308–309
Octopus grip, 202, 203
Opioids, 155
Osteopathic medicine, 8–9, 155
Pacinian corpuscles, 93, 95–96, 101, 118, 119, 120
Paget, Sir James, 7
Pain. See also Low-back pain (LBP); Muscle pain syndromes
acute pain, 111
cutaneous pain, 125
nociception and nociceptors, 104–105, 111
pain–spasm–pain cycle, 111, 113, 115–116
polymodal pain, 111
referred pain, 136–138, 253
Widespread Pain Index (WPI), 152
Pain–spasm–pain cycle, 111, 113, 115–116
Palmar stretch, 303–304
Palmer, David Daniel, 9
Palpatory examination, 195–197
Paravertebral muscles, elongation of, 305
Paré, Ambroise, 6
Paris, Stanley, 12
Paroxetine, 155
Pathophysiology of soft tissue repair, 69–72
Peckman, John, 24
Pectoralis major muscle play/pectoralis minor manipulation, 285–286
Periosteum, 47
Peripheral neuropathy, 128
Peripheral sensitization, 142–144
Piriformis release in prone, 264–266
Plantar fascia manipulation, 278–279
Plasma cells, 35
Plasticity, of connective tissue, 50
Pharmacological management, of fibromyalgia (FMS), 155
Physical therapy for chronic pain, 125
diagnosis and, 183–184
dry needling, 145–146
for myofascial pain syndrome, 145–147
trigger point injections, 147–148
trigger point release, 146–147
Physical therapy dry needling, 145–146
Physiology of myofascial manipulation
blood flow and temperature, 80–82
collagen distribution, 85–86
fibroblastic activity/collagen synthesis during healing process, 83–85
metabolism, 82–83
reflexive (autonomic) effects, 83
Piezoelectric effect, 50
Piriformis cross-friction of piriformis insertion, 263–264
piriformis release in prone, 264–266
Plantar fascia manipulation, 278–279
Plasma cells, 35
Plasticity, of connective tissue, 50
PNF (proprioceptive neuromuscular facilitation), 25
Polymodal pain, 111. See also Pain
Position sense, 109–110
Positional theory, 4–10
Positioning of patient and therapist, 201–202
Positron emission tomography, 154
Postural and structural evaluation
cervical spine, 190–191
forward-head posture, 186–190
lumbar spine, 191–193
observation of posture, 185–193
thoracic spine, 191, 192
Postural instruction, 201
Power grip, 204
Pregabalin, 155
Primary endings of muscle spindles, 98
Proprionceptive neuromuscular facilitation (PNF), 25
Proteoglycans, 35
Proximal hamstring stretch, 259–261
Psoas release, 244–246
Quadratus lateral erector spinae release, 224–225, 226
Quadriceps, transverse muscle play of, 249–252
Receptive field, 94–95
Receptor influence on movement
basics of motor control, 105–106
Golgi tendon organs (GTOs), 107–108
joint receptors, 108–109
muscle stretch reflex (MSR), 106–107
nociception, 111
skin receptors and position sense, 109–110
Reciprocal inhibition, Sherrington’s law of, 189
Referred pain, 136–138, 253
Reflex sympathetic dystrophy (RSD), 19–20
Reflexive approaches to myofascial manipulation, 17–21
Reflexive effects of massage, 83
Remodeling or maturation phase of wound healing, 72
Renaissance, 6
Repositioning
Galen’s technique of, 6
Hippocratic method of, 4–6
osteoapathy and repositioning of subluxation, 9–10
Reticulin, 35, 37, 38
Reticuloendothelial system, 37
Retinacular stretch, 304
Retro-orbital decompression, 312–313
Ribs
first rib shoulder depression technique, 282–283
unilateral posterior/anterior articulation of first rib, 281–282
Rolf, Ida, 21–22, 50
Rolfing (Structural Integration), 21–23
RSD (reflex sympathetic dystrophy), 19–20
Ruffini corpuscles, 50, 93, 96, 101, 119, 120
Sacrum
bilateral sacral release, 222–223
lateral sacral release, 221–222
Sarcomeres, 54–56, 59, 140, 147
Scapular framing, 289–292
Scapular manipulation, 294–296
Scar formation, 77–78
SCM. See Sternocleidomastoid (SCM) muscle play
Seated pectoral anterior fascial stretch, 286–287
Secondary endings of muscle spindles, 98
Sensory dysfunction and myofascial pain syndrome, 135–138
Sequencing of treatment, 200–201
Sharpey’s fibers, 59, 61
Shearing, definition of, 40
Sherrington’s law of reciprocal inhibition, 189
Side-bending elongation quadratus stretch, 225–229
Single photon emission computed tomography, 154
Skeletal muscles. See Muscles
Skin receptors, 109–110
Skin rolling, 196, 197
Small-diameter muscle afferents (III and IV), 93, 102–104, 121
Snelson, Kenneth, 62
Soft tissue lesion and mechanical dysfunction, 126–128
Soft tissue manipulation versus joint manipulation, 199–200
Soft tissue repair, pathophysiology of, 69–72
Somatic dysfunction, 127, 183
Spasms, 111, 113, 115–116, 131
“Spine engine” model, 52
Splay technique
forearm, 301–303
hamstring, 258–259
Sternocleidomastoid (SCM) muscle play, 313–314
Still, Andrew Taylor, 8
Still, Charles, 9
Strain
definition of, 40
stress–strain curve, 41, 44–45
Stress–strain curve, 41, 44–45
Structural Integration (Rolfing), 21–23
Subcranial myofascia, manipulation of, 308–309
Subluxation theory, 9–10, 12
Subsarcolemma, 59
Subscapularis, 287–288
Tapotement massage techniques, 21
Taut bands, 73, 131, 132
Temperature, massage’s effects on, 80–82
Temporalis manipulation, 310–311

Tendons
as dense regular connective tissue, 46
function of, 46
insertion of, to bone, 59–61

Tensegrity
of architectural structures, 13, 61–62
biotensegrity of musculoskeletal system, 61–63

Tension, definition of, 40

Therapeutic techniques
care and protection of hands, 202–205
cervical spine, 205–248
lumbar spine, 205–248
lumbopelvic/lower quarter area, 248–279
positioning of patient and therapist, 201–202
sequencing of treatment, 200–201
thoracic/upper thoracic spine and upper extremity, 279–304
use of ground to facilitate weight shifting, 202
use of lever arms as force multiplier, 202
use of therapist’s body weight, 202

Thixotropy
clinical implications of, 115–116
definition of, 50, 114–115
erector spinae muscle play and, 121
mechanisms of, in muscle, 115
neurophysiological implications of, 116–117

Thoracic rotational laminar release, 298–299

Thoracic spine, evaluation of, 191, 192

Thoracic/upper thoracic spine and upper extremity
anterolateral fascial elongation, 288–289
biceps stretch, 300
bilateral upper thoracic release, 283–284
first rib shoulder depression technique, 282–283
forearm “ironing,” 300–301
lateral elongation of upper thoracic area, 279–281
muscle splay of forearm, 301–303
myofascial trigger point release (infraspinatus)
flat palpation, 292–294
myofascial trigger point release (upper trapezius)
pincer palpation, 294
palmar stretch, 303–304
pectoralis major muscle play/pectoralis minor
manipulation, 285–286
retinacular stretch, 304
scapular framing, 289–292
scapular manipulation, 294–296
seated pectoral anterior fascial stretch, 286–287
subscapularis, 287–288
therapeutic techniques, 279–304
thoracic rotational laminar release, 298–299
transverse fascial stretch of biceps, 299–300
transverse muscle bending of forearm, 303
unilateral posterior/anterior articulation of first rib, 281–282
upper extremity and posterior quadrant fascial elongation, 296–298

Thrust manipulation, 12

Tibia
bony clearing of, 271–274
lateral fascial distraction of, 274

Tissue rolling, 196, 197, 211–212

Traction and manual pressure, 4–5

Trager, Milton, 23–24
Trager/Tragering, 23–24

Tramadol, 155

Transverse fascial stretch of biceps, 299–300
Transverse muscle bending of forearm, 303
Transverse muscle play of gastrocnemius–soleus, 268–270
Transverse muscle play of hamstrings, 267–268
Transverse muscle play of hamstrings and adductor magnus: posterior-to-anterior pressure, 268
Transverse muscle play of quadriceps, 249–252

Truamatized connective tissue, response of, to immobilization, 77–78

Travell, Janet, 128

Treatment. See Therapeutic techniques

Tricyclic antidepressants, 155

Trigger point injections, 147–148

Trigger point release, 146–147

Trigger points
autonomic aspects, 144–145
autonomic dysfunction, 138–139
clinical characteristics of myofascial pain, 132–139
contractures of, 140–142
diagnosis of myofascial pain syndrome, 129–132
energy crisis hypothesis of, 140–141
management of myofascial pain, 145–149
motor and mechanical dysfunction, 133–135
myofascial pain syndrome defined, 128–129
myofascial trigger point release (infraspinatus)
flat palpation, 292–294
myofascial trigger point release (upper trapezius)
pincer palpation, 294
pathogenesis of, 139–149
peripheral and central sensitization, 142–144
physical therapy dry needling, 145–146
referred pain patterns of, 136–138
sensory dysfunction, 135–138
trigger point injections, 147–148
trigger point release, 146–147

Trochanter rocking, 248–249, 250

Unilateral posterior/anterior articulation of first rib, 281–282
