

About the Authors

Richard L. Simpson, EdD, is a professor of special education at the University of Kansas. He has also been a special education teacher, school psychologist, and coordinator of a community mental health outreach program. His other professional experiences include directing several University of Kansas and University of Kansas Medical Center demonstration programs for students with autism spectrum disorders and coordinating numerous federal grant programs related to students with autism spectrum disorders and other disabilities. He has authored numerous books, articles, and tests on the topic of students with disabilities. His research interests include students with emotional–behavioral disorders, parent–family participation, effective practices for students with disabilities, and autism spectrum disorders.

Nancy A. Mundschenk, PhD, is an associate professor in the Department of Educational Psychology and Special Education at Southern Illinois University. Dr. Mundschenk provides ongoing staff development and consultation to parents, schools, teachers, and administrators in problem solving in a three-tier model of school supports and increasing meaningful parent participation in the educational decision-making process. She co-directed a 3-year federally funded interdisciplinary collaboration training project, and she currently serves as a regional coordinator for a state-funded project to support early intervening services and response to intervention within a collaborative problem-solving model. Her research interests include students with emotional–behavioral disorders, collaborative service delivery, parent–family participation, data-based decision making, and autism spectrum disorders.
