

# Meet the Authors

**Edward L. Meyen** is a professor of special education and co-director of the e-Learning Design Lab at the University of Kansas. Meyen has published extensively in areas related to instruction, curriculum, and programming for students with exceptional learning needs. In recent years, his research, teaching, and publishing have centered on e-learning with a focus on evaluation and designing and teaching online instruction. Meyen is currently involved in the development of online lessons and tutorials related to standards-based instruction and statewide assessments. His current research interests are in the areas of online instructional design, assessment, content managements processes, and knowledge object instructional development systems.

**Yvonne N. Bui** is an assistant professor and chairperson of the Department of Learning & Instruction at the University of San Francisco (USF). Bui has published in areas related to curriculum and instruction for students with disabilities, particularly those in urban areas. In recent years her research, teaching, and publishing have focused on developing instructional strategies for low-performing students from culturally and linguistically diverse backgrounds. Bui is currently the project director for a personnel preparation grant from the Office of Special Education Programs at USF. The credential/masters program prepares candidates to teach in special education settings in urban school districts with a focus on mild to moderate disabilities.
