

About the Authors

Katrina Kaiser, Katherine Romero-Davis, Deborah Schott, and Christy Yacono are certified speech-language pathologists who currently work in the acute inpatient/outpatient rehabilitation hospital setting. They work with adults who have suffered cognitive, communication, and swallowing deficits as a result of neurological dysfunction. The authors are particularly interested in using these attention exercises in the rehabilitation process.

Acknowledgment

We would like to acknowledge the patients for whom we developed these exercises. It is the patients who continue to inspire us.
