RE: Revision to Item 36 on the Eye-Hand Coordination subtest

We have received concerns regarding the short amount of time allowed on Item 36 of the Eye-Hand Coordination subtest. It was normed with a short time allowance, but we are learning that it is difficult even for children who don't have a problem with that skill. As a result, we are revising the time allowed to the following:

- 2 Places all 8 pegs in board in 18 seconds.
- 1 Places all 8 pegs in board in 19-20 seconds.
- 0 Places all 8 pegs in board in 21 or more seconds

Additionally, children are allowed to use two hands to complete this task without any penalty.

If you have any questions, please contact testquestion@proedinc.com.
