

ABOUT THE AUTHORS

Stephanie M. Peterson is assistant professor of special education at The Ohio State University. She earned her doctorate in special education and behavior analysis at The University of Iowa. Prior to earning her doctorate, she was a special education teacher at the fourth-, fifth-, and sixth-grade levels. Her research interests include functional assessment of problem behavior, positive interventions for problem behavior, and choice-making (concurrent operants) interventions for problem behavior.

Lloyd D. Peterson is visiting professor of special education at The Ohio State University. He earned his interdisciplinary doctorate in special education and educational administration at Utah State University. Prior to earning his doctorate, he was a special education teacher, and after he earned his doctorate, he was principal of a middle school. His research interests include prevention of school violence, generalization of learned skills to new environments, and distance education.

Laura N. Lacy is a doctoral student in special education at The Ohio State University. Prior to returning to school as a doctoral student, she was a special education teacher at the elementary and intermediate levels. Her research interests include applied behavior analysis, problem behavior, and proactive interventions for problem behavior.
