CHAPTER 1
Anatomy, Neuroanatomy, and Physiology of the Speech Mechanism

Respiration: Structures and Processes  1
  Respiration Patterns During Speech Production  1
  Framework of Respiration  2
  Muscles of Respiration  6

Phonation: Structures and Processes  8
  The Larynx  8
  Laryngeal Structures and Cartilages  9
  Intrinsic Laryngeal Muscles  11
  Extrinsic Laryngeal Muscles  12
  Vocal Folds  13
  Physiology of Phonation  14
  Neuroanatomy of the Vocal Mechanism  16

Resonation and Articulation: Structures and Processes  17
  Fundamentals of Resonation  17
  Fundamentals of Articulation  18

Neuroanatomy and Neurophysiology: The Nervous System  30

Neurons and Neural Transmission  30
  Anatomy and Physiology of Nerve Cells  30
  Neural Transmission  31

The Peripheral and Autonomic Nervous Systems  33
  Peripheral Nervous System  33
  Autonomic Nervous System  43

The Central Nervous System  44
  Basic Principles  44
  The Brainstem  44
  Reticular Activating System  48
  Diencephalon  49
  Basal Ganglia  49
  The Cerebellum  50
  The Cerebrum  51
  Pyramidal System  56
  Corticobulbar Tract  57
  Extrapyramidal System  57
  Connecting Fibers in the Brain  60
  The Cerebral Ventricles  61
CHAPTER 2

Physiological and Acoustic Phonetics: A Speech Science Foundation  72

Basic Principles and Definitions  73
  Definitions  73

Phonetic Transcription  75
  The International Phonetic Alphabet  75
  Broad Phonetic Transcription  75
  Narrow Phonetic Transcription  75

Production of Segmentals: Consonants and Vowels  77
  Consonants and Vowels: The Syllable as a Unit  77
  Classification Systems  78
  Consonants  80
  Vowels  84

The Effects of Context on Speech Sound Production  88
  Dynamics of Speech Production  88
  Suprasegmentals  88

Speech Science: Physiological Phonetics, Acoustic Phonetics, and Speech Perception  90
  Acoustics: Basic Definitions  90

Introduction to the Study of Sound and Acoustic Analysis of Speech  92
  Sound Wave Generation and Propagation  92
  Frequency and Pitch  93
  Amplitude and Loudness  94
  Sound Pressure Level and Hearing Level  94
  Introduction to the Acoustic Analysis of Speech  95

Chapter Highlights  96
Study and Review Questions  97
Study and Review Answers  100
CHAPTER 3
Language Development in Children 102

Terms and Definitions 103
Morphology 103
Syntax 105
Semantics 106
Pragmatics 108

Typical Language Development: Developmental Milestones 109
Role of the Caregiver in Language Development 109
Birth–1 Year 110
1–2 Years 112
2–3 Years 114
3–4 Years 117
4–5 Years 119
5–6 Years 120
6–7 Years 122
7–8 Years 123

Language and Literacy Development in the School-Age Years 124

Theories of Language Development 125
Behavioral Theory 125
Nativist Theory 126
Cognitive Theory 127
Information-Processing Theory 128
Social Interactionism Theory 131

Chapter Highlights 133

Study and Review Questions 134
Study and Review Answers 140

CHAPTER 4
Language Disorders in Children 142

Introduction to Children With Language Disorders 143
Description of Language Disorders in Children 144
Risk Factors for Language Disorders in Children 144

Children With Specific Language Impairment 145
Characteristics of Children With Specific Language Impairment 145
Children With Language Problems Associated
With Physical and Sensory Disabilities 149
   Intellectual Disability 149
   Autism Spectrum Disorder 151
   Brain Injury 153
Children With Language Problems Related
to Physical and Social–Environmental Factors 156
   Language Problems Related to Poverty 156
   Language Problems Related to Neglect or Abuse 158
   Language Problems Related to Parental Drug and Alcohol Abuse 159
   Language Problems Related to Attention-Deficit/Hyperactivity Disorder 160
Assessment Principles and Procedures 162
   Language Assessment: General Principles and Procedures 162
   Assessment of Infants and Toddlers 166
   Assessment of Preschool and Elementary-Age Children 169
   Assessment of Adolescents 171
Treatment Principles and Procedures 174
   General Principles 174
   Specific Techniques and Programs 176
   Augmentative and Alternative Communication 181
Chapter Highlights 184
Study and Review Questions 186
Study and Review Answers 192

CHAPTER 5
Speech Sound Development and Disorders 194

Foundations of Articulation and Phonology 195
   Basic Definitions 196

Acquisition of Articulatory and Phonological Skills: Typical Development 197
   Theories of Development 197
   Infant Development: Perception and Production 199
   Typical Articulation Development in Children 201
   Overall Intelligibility 201
   Typical Phonological Development in Children 203

Speech Sound Disorders 205
   General Factors Related to Speech Sound Disorders 205
   Description of Articulatory Errors 207
   Organically Based Disorders 208
CHAPTER 6

Fluency and Its Disorders 236

Fluency and Stuttering: An Overview 237
Definition and Description of Fluency 237
Definition and Description of Stuttering 238
Forms of Dysfluencies 239
Theoretical and Clinical Significance of Dysfluencies 240
Incidence and Prevalence of Stuttering 241
Onset and Development of Stuttering 245
Associated Motor Behaviors 246
Associated Breathing Abnormalities 246
Negative Emotions and Avoidance Behaviors 247
The Loci of Stuttering 247
Stimulus Control in Stuttering 248
People Who Stutter and Their Families 249
Theories of Stuttering 250

Assessment and Treatment of Stuttering 252
Assessment of Stuttering 252
Treatment of Stuttering 254

Neurogenic Stuttering 261
Definition and Etiology of Neurogenic Stuttering 261
CHAPTER 7

Voice and Its Disorders  272

Vocal Anatomy and Physiology  273
  The Larynx  273
  Voice Changes Through the Life Span  280

Vocal Pitch, Loudness, and Quality  282
  Pitch  282
  Loudness  283
  Quality  283

Evaluation of Voice Disorders  285
  Case History: Purposes and Goals  285
  A Team-Oriented Approach  286
  Instrumental Evaluation  286
  Perceptual Evaluation  291
  Quality of Life Evaluation  293

Disorders of Resonance and Their Treatment  294
  Hypernasality  295
  Hyponasality  296
  Assimilative Nasality  296
  Cul-de-Sac Resonance  296
  Treatment Principles  297

Disorders of Phonation and Their Treatment  298
  Carcinoma and Laryngectomy  299
  Voice Disorders  303
  Physically Based Disorders of Phonation  304
  Idiopathic Voice Disorders  317
  Neurologically Based Voice Disorders  317
Neurologically Based Communicative Disorders 336

Aphasia 337
Incidence and Prevalence of Aphasia 337
Neuropathology of Aphasia 338
Key Terms 339
Definition and Classification of Aphasia 340
Nonfluent Aphasias 340
Fluent Aphasias 344
Subcortical Aphasia 348
Crossed Aphasia 348
Aphasia in Bilingual Populations 348
Assessment of Aphasia 349
Treatment of Aphasia 354
Alexia and Agraphia 359
Agnosia 360

Dementia 360
Definition and Classification of Dementia 361
Dementia of the Alzheimer Type 361
Frontotemporal Dementia 363
Dementia Associated With Parkinson's Disease 366
Dementia Associated With Huntington's Disease 367
Infectious Dementia 368
Other Forms of Dementia 371
Assessment of Dementia 372
Clinical Management of Dementia 373

Right Hemisphere Disorder 375
The Right and the Left Hemispheres 375
Symptoms of Right Hemisphere Disorder 375
Assessment of Right Hemisphere Disorder 377
Treatment of Right Hemisphere Disorder 378
CHAPTER 10
Cleft Palate, Craniofacial Anomalies, and Genetic Syndromes  430

Craniofacial Anomalies and Cleft Palate  431
Craniofacial Anomalies  431
Cleft Lip  431
Cleft Palate  432

Genetic Syndromes  444
Genetic Syndromes Associated With Communication Disorders  444

Chapter Highlights  453
Study and Review Questions  453
Study and Review Answers  458

CHAPTER 11
Communication Disorders in Multicultural Populations  460

Foundational Issues  461
General Cultural Considerations  462
ASHA Guidelines Regarding Multicultural Issues  463

Speech–Language Characteristics of CLD Clients  464
Dialects of American English  464
African American English  465
Characteristics of AAE Morphology, Syntax, and Articulation  466
Spanish–Influenced English  468
English Influenced by Asian Languages  471

Language Differences and Language Impairment  476
Differentiating Language Differences From Language Impairments  476
Acquiring a Second Language  477
Basic Interpersonal Communication Skills and Cognitive–Academic Language Proficiency  479

Assessment of EL Students  481
Legal Considerations  482
Considerations in the Use of Standardized Tests  482
Alternatives to Standardized Tests  485
Working With Interpreters in the Assessment Process  487

Treatment Considerations in Service Delivery to CLD Clients  488
Children With Language Impairments  489
Serving CLD Adults: Prevalence and Incidence Rates of Medical Conditions and Communication Disorders  490
Contents

Potential Sociocultural and Linguistic Barriers to Service Delivery 491
Adults With Neurologically Based Disorders of Communication 492

Chapter Highlights 495
Study and Review Questions 497
Study and Review Answers 503

CHAPTER 12
Audiology and Hearing Disorders 506

Anatomy and Physiology of Hearing 508
The Outer Ear 508
The Middle Ear 508
The Inner Ear 511
The Auditory Nervous System 513

Acoustics: Sound and Its Perception 515
The Source of Sound 515
Sound Waves 516
Frequency and Intensity 517
Sound Pressure Level and Hearing Level 518

The Nature and Etiology of Hearing Loss 519
Normal Hearing 519
The Nature of Hearing Impairment 520
Conductive Hearing Loss 520
Sensorineural Hearing Loss 525
Mixed Hearing Loss 528
Auditory Nervous System Impairments 528

Assessment of Hearing Impairment 531
Audiometry: Basic Principles 531
Pure-Tone Audiometry 532
Speech Audiometry 533
Acoustic Immittance 533
Other Methods 534
Hearing Screening 534
Assessment of Infants and Children 535
Interpretation of Hearing Test Results 535

Management of Hearing Impairment 539
Communication Disorders of People With Hearing Impairment 539
Aural Rehabilitation: Basic Principles 541
Amplification 542
CHAPTER 13
Assessment and Treatment: Principles of Evidence-Based Practice  560

Evidence-Based Practice in Speech–Language Pathology  561

Standard Assessment Procedures  562
Screening  562
Case History  563
Hearing Screening  565
Orofacial Examination  565
Interview  565
Speech and Language Sample  566
Obtaining Related Assessment Data  567

Principles of Standardized Assessment  568
The Nature and Advantages of Standardized Assessment  568
Limitations of Standardized Tests  569
Prudent Use of Standardized Tests  570
Types of Scores in Standardized Assessment  571
Validity and Reliability of Standardized Tests  572

Rating Scales, Questionnaires, and Developmental Inventories  573
Rating Scales  573
Questionnaires and Interviews  573
Developmental Inventories  573

Alternative Assessment Approaches  574
Functional Assessment  574
Client-Specific Assessment  575
Criterion-Referenced Assessment  576
Authentic Assessment  576
Dynamic Assessment  577
Comprehensive and Integrated Assessment  577

Treatment of Communication Disorders: Basic Concepts  578
Treatment: Definition  578
A Treatment Paradigm for Communication Disorders  579
Basic Treatment Terms  579
Reinforcers and Reinforcement  583
An Overview of the Treatment Process 585
Selection of Treatment Targets 585
Treatment Sequence 586
Maintenance Program 587
Follow-Up 588
Booster Treatment 588
A General Outline of a Treatment Program 588
Seven Steps of All Treatment Programs 589
Cultural–Linguistic Considerations in Assessment and Treatment 589
The Need for Individualized Assessment and Treatment 590
Chapter Highlights 591
Study and Review Questions 592
Study and Review Answers 595

CHAPTER 14
Research Design and Statistics: A Foundation for Clinical Science 596

Essentials of the Scientific Method 597
The Philosophy of Science: Basic Concepts 597
Validity of Measurements 599
Reliability of Measurements 600
Experimental Research 601
Definitions of Terms 601
Group Designs of Research 602
Single-Subject Designs of Research 604
Varieties of Descriptive Research 608
Basic Concepts 608
Ex Post Facto (Retrospective) Research 609
Survey Research 610
Comparative Research 610
Developmental (Normative) Research 610
Correlational Research 611
Ethnographic Research 612
Evaluation of Research 612
Internal Validity 613
External Validity 615
Levels of Evidence for Evidence-Based Practice 616
Data Organization and Analysis: Principles of Statistics 618
CHAPTER 15

Professional Issues 630

ASHA and the Professions 631

The American Speech-Language-Hearing Association 632
The Professions of Speech-Language Pathology and Audiology 635
The Scope of Practice: Speech-Language Pathology 635
ASHA Accreditation 636

Issues in Certification and Licensure 637

Clinical Certification 637
Speech-Language Pathology Assistants 640
State Regulation of the Profession 641

Legislative Regulation of the Profession 643

Federal Legislation Affecting School Settings 643
Federal Legislation Affecting Employment Settings 645
Federal Legislation Affecting Health Care Settings 646
Future Trends 648

Chapter Highlights 649

Study and Review Questions 650
Study and Review Answers 653

Appendix 654

Study and Test-Taking Tips for the Praxis 655

The Nature and Purpose of the Praxis 655
Study Tips for Preparing for the Praxis 658
General Tips for Taking the Praxis 659
Understanding Computer-Generated Questions 662
Conclusion 663

Index 664
About the Authors 694
