

Unit 1: What does a parabola look like?	2
Lesson 1: Graphing Parabolas	5
Lesson 2: Maximums and Minimums of Quadratic Functions	13
Lesson 3: Application and Assessment	23
Unit 2: How do I use the Distributive Property to multiply binomials?	32
Lesson 1: Multiplying a Monomial by a Binomial	35
Lesson 2: Multiplying a Binomial by a Binomial	43
Lesson 3: Application and Assessment	51
Unit 3: How are multiplication and factoring related?	58
Lesson 1: Factoring Trinomials	61
Lesson 2: The Difference of Two Squares, Trinomial Squares, and Trinomials where $a \neq 1$	69
Lesson 3: Application and Assessment	79
Unit 4: Why do I factor?	88
Lesson 1: Factoring to Solve Binomial Equations	91
Lesson 2: Factoring to Solve Quadratic Equations	99
Lesson 3: Application and Assessment	107
Unit 5: What is the quadratic formula all about?	116
Lesson 1: Solving Perfect Square Quadratic Equations	119
Lesson 2: The Discriminant	129
Lesson 3: Application and Assessment	137
Unit 6: How do I multiply and divide fractions when they contain variables?	146
Lesson 1: Multiplying Rational Expressions	149
Lesson 2: Dividing Rational Expressions	159
Lesson 3: Application and Assessment	167
Unit 7: How do I add and subtract fractions when they contain variables?	176
Lesson 1: Adding and Subtracting with Common Denominators	179
Lesson 2: Adding and Subtracting with Different Denominators	187
Lesson 3: Application and Assessment	197
Glossary	A1
Index	A3
