

More Basic Paragraph Practice: Writing Step-By-Step is an extension of the PCI publication, *Basic Paragraph Practice: Writing Step-By-Step*. The original program was created to provide students with a strategy for writing paragraphs. Specifically, the program was designed to teach students how to respond to a question by writing a paragraph. *More Basic Paragraph Practice* provides 100 more questions, each with an accompanying graphic organizer. Some of the questions are simple, while others are more thought-provoking. By answering these questions, students will learn and practice a process that can be used whenever they are asked to answer a question in paragraph form.

This program was created because many students have difficulty writing paragraphs. Writing can be especially challenging for students with learning differences. When faced with a journal topic, essay question, or standardized-test question, students can have difficulty deciding what to write, how much to write, and in what order to write. In addition, when students are given a blank page on which to write, some may become anxious when they see how much empty space must be filled with words. They might not realize that they need to write only as much as is necessary to answer the question or address the topic.

The five-step process presented in this program helps students organize their thoughts. The steps are:

1. Read the question.
2. Write a topic sentence that rephrases the question.
3. Write three detail sentences.
4. Write a concluding sentence that rephrases the topic sentence.
5. Rewrite the sentences in paragraph form, making sure to indent the first sentence of the paragraph.

Program Components

Research and Standards

More Basic Paragraph Practice: Writing Step-By-Step uses methodology that is both research-based and standards-based. Applicable quotes from the research and a list of standards addressed in this book can be found on page viii.

Practice Pages

To receive the maximum benefits this program offers, first have the students answer the questions on the practice pages (pages ix – xiii). Once students have successfully completed the practice pages, they can advance to the activity pages.

Activity Pages

The 100 activity pages can be used as a daily journal assignment or for other writing practice. After writing their paragraphs, you may opt to have students share their writing with the class.

THE FIVE-SENTENCE PARAGRAPH

Explain to students that it is important for everyone to know how to write a good paragraph. Many short-answer and essay questions require an answer that is not written as a fragment or a single sentence but rather as a group of sentences that all tell about the same main idea in paragraph form.

Tell students that they are going to learn how to write a five-sentence paragraph using a graphic organizer. Students will write each sentence of the paragraph in its own box. This step shows them that they must include all the parts of the paragraph. The last step will be to rewrite the five sentences in paragraph form. By using this format, students will not leave out any important parts of a paragraph. The goal of this program is to get students to become comfortable enough with the paragraph-writing process that they are able to write a complete five-sentence paragraph without the graphic organizer.

Make one overhead transparency of Sample Worksheet A (see page ix) and a photocopy of Sample Worksheet A for each student. Work through the sample worksheet together as a class. The descriptions below provide suggestions for properly guiding the students through Sample Worksheet A.

1. Read the question.

Tell students they are going to learn how to write a five-sentence paragraph. Explain that some questions can be answered with complete sentences that comprise a list, while others can be answered with a descriptive paragraph. Let students know that this graphic organizer can be used to answer any question. Also, ask students to carefully read the question. Encourage them to whisper the question to themselves. This technique often helps auditory learners to process information.

TOPIC

What are three things you do on Saturdays?

2. Write a topic sentence that rephrases the question.

Inform students that the first sentence in a five-sentence paragraph is called the topic sentence. With this sentence, students will introduce the topic of the paragraph. The topic sentence helps the reader understand or identify the main idea of the paragraph. It should repeat the question being asked. For example, "What are three things you do on Saturdays?" is the question in Sample Worksheet A. Every sentence in the paragraph will be about the topic named in the topic sentence.

Examples of a good topic sentence for this paragraph are:

Example 1: There are three things I do Saturday.

Example 2: No matter what time of year it is, I always do the same three things on Saturdays.

Example 3: As part of my Saturday routine, I do three important things.

THE FIVE-SENTENCE PARAGRAPH Continued

Tell students that at the beginning of this learning process they can write their topic sentences simply, like Example 1. As they become comfortable with writing topic sentences, they can make their sentences more complex and interesting, like Examples 2 and 3.

Once students have written their topic sentence, tell them to read the question and the topic sentence to themselves. Ask them if the topic sentence rephrases the question.

TOPIC SENTENCE Write your TOPIC sentence in the box.

Topic Sentence

There are three things I do every Saturday.

3. Write three detail sentences.

Tell students that the next three sentences make up the body of the paragraph. The three sentences after the topic sentence are called the detail sentences. Each of these sentences explains or gives an example of the topic sentence. Tell students to brainstorm three things that support the topic sentence. If the topic sentence is “There are three things I do every Saturday,” students should think of three things they do every Saturday. Tell students to write the first thing in a complete sentence in Detail 1 box. Explain to students that their sentences can be as simple or complex as they want.

BODY Write each DETAIL sentence in its box.

Detail 1

One thing I do every Saturday is sleep late.

Tell students to write the second thing in a complete sentence in the Detail 2 box.

Detail 2

Also, I eat a big breakfast with my family.

Tell students to write the third thing in a complete sentence in the Detail 3 box.

Detail 3

Every Saturday, I play basketball with my friends.

THE FIVE-SENTENCE PARAGRAPH Continued

4. Write a concluding sentence that rephrases the topic sentence.

The concluding sentence is the last sentence of the paragraph. In this sentence, students should rephrase the topic sentence. Remind students that “I do three things every Saturday” is the topic sentence. Ask them to think of a way to rephrase the topic sentence, and then write it as a concluding sentence in the Conclusion box.

Examples of good concluding sentences are:

Example 1: These are the three things I do every Saturday.

Example 2: Although I do a variety of things on different days, I do these three things every Saturday.

Example 3: Among other activities, I do these three things each Saturday.

Tell students that at the beginning of this learning process they can write their concluding sentence simply, like Example 1. As they become comfortable with writing concluding sentences, they can make their sentences more complex and interesting, like Examples 2 and 3.

Once students have written their concluding sentence, tell them to read the topic sentence and the concluding sentence to themselves. Ask them if the concluding sentence rephrases the topic sentence.

CONCLUSION Write your CONCLUSION sentence in the box. (Reword the topic sentence.)

Conclusion

These are the three things I do every Saturday.

5. Rewrite the sentences in paragraph form, making sure to indent.

Tell students to read over the sentences in the boxes to make sure they are happy with what they have written. If necessary, give them a few minutes to make changes. Then, tell students to rewrite the five sentences in a complete paragraph, making sure to indent the first line and to have all the sentences follow each other, leaving no blank spaces in between them. Rewriting the sentences helps students become comfortable writing a block of text. It also helps them understand how the sentences relate to each other. Each sentence has a purpose, and together they are parts of a whole: the paragraph.

After completing the first practice page as a group, make an overhead transparency of each remaining practice page (pages x – xiii). Also, make a photocopy of the practice pages for each student. Walk students through the remaining practice exercises by giving them time to complete the sheets on their own. Then, review the practice pages on an overhead projector with the class. Once students have completed the practice pages, they should be prepared to complete the worksheets on their own.

For an extra challenge, add the phrase “and why?” to the end of many questions. By doing this, students will have to explain their answers, not just give one-word or very brief answers. This activity leads to the writing of more complex sentences within the structure of the five-sentence paragraph. Note: Some of the questions already have the phrase “and why?” added to them to help students better understand what ideas they need to express in their answer.
