

# About the Authors

---

**James G. Schumacher**, MS, CCP–SLP, is a speech–language pathologist at the Veterans Affairs Medical Center in Minneapolis, Minnesota. His interests are in neurogenic communication disorders, including aphasia, dysarthria, and apraxia of speech. He received a bachelor of science degree in communication disorders from the University of Wisconsin–Milwaukee, and went on to receive his master of science degree from the University of Wisconsin–Madison.

**Robert L. Keith**, MS, CCC, is an emeritus speech pathologist at the Mayo Clinic in Rochester, Minnesota and an emeritus associate professor at the Mayo Medical School. He received a bachelor of science degree in elementary education, speech pathology, and psychology from Minot State Teachers College, and received a master's degree in speech pathology and audiology, and psychology from the University of North Dakota in Grand Forks. He did post graduate work at the University of Missouri at Columbia. In 1962 he was invited to work at the Mayo Clinic where he stayed until his retirement in 1995. His major interests included aphasia, dysarthria, and laryngectomy rehabilitation.
